EVG Delivery System

Evogue

EVG Delivery System

Outstanding Instrument flexibility provides operator comfort during procedures.

Delivery Head Utility

Delivery head pivots from its center, offering a 90°-to-90° rotation. This supports efficiency and comfortable positioning of the delivery system handpieces for the doctor, in relation to the patient.

Seat Positioning Access

Built-in seat positioning membrane control touchpad is centrally located on the delivery head, so left- and right-handed doctors have easy, line-of-sight access to controls during patient treatment.

Water Supply System

A self-contained bottled water system gives operators control over water source quality used during treatment procedures. Water bottles are easily removed, refilled, and replaced with a quick disconnect feature.

EVG3573B & EVG3800B

EVG3500Q & EVG3535N

EVG3510B & EVG3535N

EVG swing-mounted delivery and assistant instrument option with Clesta LED Light on a B50N chair.

EVG over-the-patient delivery system and assistant instruments with PMU and cuspidor, with Clesta LED dental light option, mounted on a Q5000 chair.

EVG over-the-patient delivery system and assistant instruments with PMU, with Clesta LED light option, mounted on a B50N chair.

*Additional accessories also shown.

Integration

Optional accessories, such as a micromotor, handpiece fiberoptics, and scaler can be seamlessly integrated onto the delivery head, reducing operatory clutter.

Cleanliness

Unique, assistant instrument arm hose tender on traditional over-the-patient delivery models keeps vacuum and syringe hoses clean, off of the floor and out of the operator's way.

Multiple Configurations

EVG is available in swing-mount, over-the-patient, and rear cabinet-mounted configurations, specifically complementing the functions of Belmont's D66CM, K66, and ECO6 cabinets.
